PHYSICS COLLOQUIUM

Einstein and Physics

Richard Conn Henry:
University of Maryland

ABSTRACT

Einstein deserved four Nobel Prizes for Physics, but received only one: ironically, for Quantum Mechanics, which he rejected. His contributions to the beginnings of QM were fundamental, but his rejection, in the end, of QM was, in my view, severely damaging to society. After briefly describing those matters, I will turn to the pleasant task of trying to teach everyone Special Relativity AND General Relativity, correctly and completely, all of this to take less than an hour. Wish me luck!

Monday, March 27, 2006
S2 Bldg. Room 144
PRESENTATION 2:30 PM– 3:30PM
ALL WELCOME – COFFEE AND REFRESHMENTS AT 2:20PM
